JLG® Electric Powered Aerial Work Platforms
Keeping Your Job Cleaner and Greener.

Today, more people are demanding environmentally-friendly equipment. More municipalities are demanding “green” building for new construction and renovations. The JLG® line of electric powered aerial work platforms are the green machines in the lift industry.

JLG electric powered aerial work platforms feature longer run time, greater uptime and higher productivity. The energy-efficient electric drive boosts your productivity with industry-leading duty cycles. These machines are specifically designed so you have fewer scheduled services, a quieter work area, less dependency on hydraulic oils and zero emissions.

From job start to completion, 12 ft to 60 ft, scissor lift, boom lift or mast lift, JLG has an electric lift to meet your needs and keep your job green.

“With JLG machines, I can get the job done faster and with less impact on the environment.”
ES Series
ELECTRIC SCISSOR LIFTS

Ready to Work Overtime.

Experience the benefits of reduced charging time and longer runtime with ES Series scissor lifts. You can stay on the job longer, getting more work done in one day. And the optional application-specific accessory packages enhance productivity.

With only two hoses and four fittings, you’re working with a cleaner machine that decreases scheduled service requirements and reduces the chance for leaks.

Up to 1,000 lb capacity, proportional controls for ease of operation and optional accessory packages give you exactly what you need to get the job done.

“I’m always impressed with how much runtime we get before recharging.”

Dual Capacity
The 2630ES and 3246ES are rated for dual capacity. Restricted capacity on the 2630ES is 500 lb, and unrestricted is 800 lb. The 3246ES features 700 lb restricted and 1,000 lb unrestricted capacity.

Narrow or Wide Platforms
The 1930ES, 2030ES and 2630ES feature 30-inch narrow platforms for access through standard doorways. The 2646ES and 3246ES provide a 46-inch platform for more worker tools or supplies.

ES SERIES

Longer runtime
On a single charge, the electric drive delivers more than double the battery life of hydraulic drive machines.

One-Handed Operation
Fully proportional drive and lift control is smoother and more efficient.
Raising Your Uptime.

From commercial construction to hospitals, schools and facilities maintenance applications, the RS Series can be used virtually anywhere there’s work to be done.

Available in two models, the 1932RS features up to 19 ft platform height and 500 lb capacity and the 3248RS has up to 32 ft of platform height and 705 lb capacity.

The ruggedness of the RS Series makes these machines extremely reliable. And its industry-leading duty cycles provide the advantage of longer runtime. The RS Series has the value you need without sacrificing performance and quality.

Low Cost of Ownership

No moving parts to repair or replace in the passive pothole protection system, and leak points are minimized with a design that includes 4 hydraulic hoses.

Extremely Mobile

Innovative operator controls, similar to the ES Series, and compact dimensions enable travel through doorways.

25% Gradeability

Both models have the ability to load without assistance and

On-Board MDI Display

The Multifunction Digital Indicator simplifies battery evaluation and fault diagnosis.
Outstanding Performance, On Slab and Off.

Handle a wide variety of terrain indoors and out, without noise and fumes thanks to the quiet operation and zero emissions of the LE Series. With the standard oscillating axle, 35% gradeability, rugged all-terrain tires and available all-wheel drive, you’ll be able to go off the slab and into the mud with the LE Series scissor lifts.

There are four models available with working heights up to 46 ft and a maximum platform capacity of 1,000 lb. All models will fit through standard double doorways to get you to and from the work site.

The efficient direct electric drive system gives you the muscle you’ll need for demanding jobs; and, you’ll get double the duty cycles of other electric scissors with the deep cycle batteries. Plus, the M models have the Multi-Power feature, which has an on-board diesel-powered generator with improved fuel efficiency for lower costs.

Off-Slab Mobility
Full-time automatic traction control and an oscillating axle boost off-slab productivity.

Platform Extension
A standard feature, the platform extension has a 250 lb capacity.

The ultra-compact 1230ES mast lift is compact enough to fit in a freight elevator and lightweight enough to be used on weight-sensitive floors. Its 5-in. turning radius navigates tight workspaces while heavy-duty steel wheels with non-marking rubber provide a more cushioned ride.

Charged and ready to go, the super-efficient electric drive increases your uptime and gives your productivity a lift. With 500 lb capacity, the 1230ES has the muscle to carry you and your gear, even at full height.

No chains, cables or rollers to grease or adjust in the mast means you’ve got lower maintenance requirements and operating costs. Plus, the 1230ES helps to keep your work environment clean; with only four hoses, you greatly reduce the chance for hydraulics leaks.

Saloon Gate

Saloon-style swing gate for ease of entry and exit.

98% Cleaner

Fewer hoses and couplings mean fewer potential leak points.

Tool Tray

The workstation includes tool and fastener tray, 110V AC outlet and one-hand controller operation.

Serviceability

All-steel swing-out battery doors have heavy-duty hinges. Rugged design and strong 12 ft mast provide durability.
Puts Hard to Reach Within Reach.

With the JLG Toucan® vertical mast lift, you can meet your overhead challenges head-on. Work up, over and around assembly lines, shelving, ductwork or partitions more easily and without interferences. Positioning is easier with a 360° rotating mast, up to 33 ft of lift height and over 14 ft of jib reach. With its 500 lb capacity and a long-running, environmentally-friendly electric powered drive,* the Toucan will help you boost productivity hour by hour, year after year.

Built to Take on Your Facility Challenges

Plant maintenance, retooling and changeovers, warehousing, inspection and remodeling, general contracting—you can count on the Toucan Series to help keep production moving.

As Versatile as Your Needs

With thick rubber non-marking tires, clean and efficient electric power and 25% gradeability,* you’re equipped better than ever to meet your access challenges.

Smooth proportional controls, a narrow chassis and greater horizontal outreach are just some of the features that come standard and help you get the job done with greater speed and efficiency.

*Not applicable to Model E33MJ

Work Cleaner
Thick rubber non-marking tires leave facility floors intact.

Greater Access
Compact dimensions for getting into hard-to-reach areas.
JibPLUS® Boom Option
Gain greater reach with 180-degree range of side-to-side movement.

Narrow Width
Accomplish more with greater maneuverability in tight spaces.

Turn the Corner on Productivity.

The E Series boom lifts are environmentally friendly with industry-leading performance. You can select from three platform heights and chassis widths—all with a 500 lb platform capacity—to best suit your work environment. The exclusive JibPLUS® articulating boom option has 180° range of side-to-side movement, providing you with even greater access to hard-to-reach places.

Round the Clock Performance
The E Series will keep you on the job longer than the competition with industry-leading duty cycles. The Multi-Power option gives you round-the-clock operation and faster battery charging with the QuikCharge GenSet Automatic Charging System.

Maneuverability. Inside and Out.
With automatic traction control, both drive wheels work independently for improved traction on uneven surfaces.
Clean and Green, 60-ft Machine.

The E600 series gives you the most height in an electric powered boom lift and over 43 ft of horizontal outreach. With four configurations, you can choose from electric or multi-power, standard jib or horizontally pivoting jib with JibPLUS®.

A 15,000 lb (6,804 kg) low gross vehicle weight and non-marking all-terrain tires let you work on slab or off, without hesitation. With the Automatic Traction Control, optional all-wheel drive and standard oscillating axle, you won’t need to be shy about travelling over rough terrain.

Whether your jobs include industrial applications, maintenance, construction, or anything in between, the E600 Series delivers with zero emissions and reduced noise levels.

Optional All-Wheel Drive
Power through difficult terrain on the job site.

Environmentally Friendly
Electric power system makes it possible to deliver zero emissions.
Reach What Others Can’t.

Now you can go more places around the job site thanks to the low weight and rubber tracks on JLG® Compact Crawler Boom lifts. Available in three models with working heights ranging from 45 ft to 75 ft, the compact crawler booms feature a tracked wheel carriage that climbs steps and a narrow chassis for access through gates, yards, standard doorways and public buildings. Its lightweight, compact design allows for low floor loading and ease of transport.

Increase your productivity with lift heights ranging from 39 ft to 70 ft.

You also get the advantage of a first-to-market environmentally-friendly power system on these machines—they are outfitted with an optional breakthrough Lithium-Ion electrical system that produces zero emissions and longer runtime, so the compact crawler boom runs clean while staying green.
Tow-Pro® Goes Wherever You Go.

The Tow-Pro® Series lets you tackle the same jobs as the other JLG® electric boom lifts, but with an easier option for transportation. You also have the choice of a 24V DC electric or gas-powered engine. And with the standard combination hitch, industry-leading 65 mph towing speed and hydraulic auto-leveling outriggers, you can have the Tow-Pro to the job site and working in no time.

Standard air and water lines to the platform let you tackle a variety of jobs, including residential maintenance, construction, pressure washing, tree trimming, exterior painting and maintenance tasks, with greater ease. Two models offer platform heights of 35 ft or 50 ft, and both have a 500 lb capacity for you and your tools.

Innovative Controls

Detachable platform controls provide faster and more efficient boom positioning with one-hand operation of all boom functions.

More Rigidity

The proven telescopic boom has a more rigid platform feel, allowing for improved worker confidence.

Easy Access

The articulating jib on the T500J gets you into those hard-to-reach places.

Optional Generator

An accessory mounting tray accommodates a generator, air compressor or pressure washer.
Putting Your Work Above Everything.

When it comes to JLG® Ground Support, it’s all about you. Your productivity. Your profitability. Your uptime. From the purchase of your first piece of equipment straight through to the training, parts and maintenance that follows.

- **Customer Service Call Center**
  You can be assured we’ll be giving an all-out effort to support you. Just think of us as your personal on-call, full-service support team. We make it happen. Period.

- **Financial Solutions**
  Maximizing your profits. Preserving your cash flow. Let our financing specialists help choose the program designed specifically for your needs.

- **Aftermarket Parts**
  Keep your equipment running at peak performance with genuine replacement parts, accessories, attachments, rebuilt and competitive parts all from one source—JLG.

- **Training**
  Knowing your equipment inside and out results in higher productivity on the job. Our instructor-led courses give you the hands-on time you need to successfully operate equipment.

- **Service Centers**
  Your needs. Your uptime. JLG is on the job to fulfill your every need, from repair, reconditioning, same-day parts and much more. We’re here to support you.

- **Pre-Owned Equipment**
  As a high-value alternative to purchasing new equipment, you can search our used equipment inventory of pre-owned JLG and competitor products.
Optional Workstation in the Sky® accessory packages are designed for the specific needs of electricians, plumbers, contractors and plant maintenance professionals.
Accessories that Extend Your Scissor Lift’s Versatility.

Workstation in the Sky® accessory packages are designed to keep your tools and components within arm’s reach. Choose from packages that feature a removable workstation that optimizes platform space with compartments for tools such as a reciprocating saw, drill, circular saw, battery charger and 6 in. x 6 in. component boxes. Plus, a pull-out tray is included to provide a flat working surface near the top of the rails.

**Plumber’s Package**

Manufacturer-approved pipe racks provide positive retention of materials for plumbing contractors, while storage outside the platform helps prevent rail damage and optimizes space.

**Electrician’s Package**

For electrical contractor applications that require battery-powered tools, the JLG® workstation keeps your tools within reach and off the floor of the platform. A stowable workbench and molded pockets provide ample storage while leaving the workspace open to get the job done. Electrician’s Tree carries six 500 ft wire spools to speed up wire pulling and reduce friction associated with ground-based wire trees.

**Plant Maintenance Package**

The Plant Maintenance Package combines popular elements of the Electrician and Plumber packages to help plant maintenance professionals perform tasks, ranging from general repair to electrical and mechanical installation. In addition, a small welder powered by the machine batteries is included for light repairs.
**Main Features**

- **Best on-the-job performance** — Double duty cycles for longer operating times, tight turning radius for maneuvering and positioning, and a rugged design.
- **Narrow aisle models** — Efficiently access hard-to-reach areas for more productive maintenance projects.
- **Revolutionary new Workstation in the Sky® options and accessories.**

## JLG® Electric Powered Aerial Work Platforms

### Specifications

#### Main Features
- 4 ft (1.22 m) articulating jib with optional JibPLUS®.
- ATC (Automatic Traction Control) improves performance on uneven surfaces.
- Ultra compact width of only 48 in. (1.22 m).
- Fast cycle times.

#### Main Features
- The fastest boom speeds in this class.
- ATC (Automatic Traction Control) improves performance on uneven surfaces.
- QuikCharge GenSet option provides automatic charging for continuous machine operation.

#### Main Features
- JibPLUS® models provide access in and around confined work areas.
- 4 ft 11 in. narrow chassis model for maneuvering in narrow aisles and confined areas.
- ATC (Automatic Traction Control) improves performance on uneven surfaces.
- QuikCharge GenSet option provides automatic charging for continuous machine operation.

### Available Options Include
- Fall Arrest Platform 36 x 72 in. (0.91 x 1.83 m)
- Padding for Platform
- Solid Non-Marking Tires
- UL® EE Rating
- 1200 Watt Inverter

For complete specifications, visit [www.jlg.com](http://www.jlg.com)
Main Features
• The world’s first and only 60-foot electric boom—Indoor and outdoor versatility.
• Indoor advantages—Zero emissions, industry-leading noise reduction, non-marking tires and the lowest weight in its class.
• Outdoor advantages—Rugged design with all-wheel drive, automatic traction control and oscillating axle.
• Available with 45 amp Kubota diesel-powered generator to maintain battery charge level during extended outdoor use.

Main Features
• Versatile articulating jib provides up to 14 ft 6 in. (4.42 m) up and over reach.
• 360-degree rotating mast for unmatched positioning capabilities.
• Capacity for two workers and supplies.
• Drive through doorways and narrow aisles.
• Navigate around multiple obstacles on the ground and in the air.

The JLG “1 & 5” Warranty
JLG Industries, Inc. backs our products with our exclusive “1 & 5” Warranty. We provide coverage for one (1) full year, and cover all specified major structural components for five (5) years. These machines meet or exceed applicable OSHA Regulations in 29 CFR 1910.67, 29 CFR 1926.456, ANSI A92.5-2006 and CSA standard B354.4-02 as originally manufactured for intended applications. We reserve the right to make price, specification, and/or equipment changes without prior notification.
