Easy To Operate With Controls at Operator's Station

The Broce Curb Sweeper is a special option available on all 4-wheel model Broce Brooms. This attachment has been designed to help close in places that are tough to reach and are outside the sweeping radius of the main broom core.

The Broce Curb Sweeper features a 27" diameter brush, heavy-duty construction, a reversible hydraulic motor and hydraulically operated float and down pressure for heavy sweeping.

Optional Curb Sweeper

Keep The Dust To A Minimum For Convenience and Safety

Our 150 gallon rust proof water spray system consists of a low profile polyethylene tank, 2.1 gpm electric pump, strainer filter and 8 spray nozzles to control excessive dust with the push of a button. This system also includes a back flow valve to prevent tank drainage when not in use.

Water Spray Systems

Dust Control When You Need It

Exclusive Joystick broom control with easy access from operator’s station.

Optional Suspension seat.

Optional 7 1/2 Foot Scraper Blade

When heavy material buildup is a problem, the Broce Scraper Blade is a must!

Use The Blade For Cleaning Behind Your Milling Machine or Chip and Seal Jobs

The blade will hydraulically lift vertically for clearance and angle right to left with a control located at operator’s station. A quick coupling allows the blade to be removed when not in use. The replaceable cutting edge will give hours of continued use.

Engine Options & Ease of Maintenance

The enclosed engine cover is standard equipment on all Broce Brooms. With John Deere, Cummins and Caterpillar diesel engines to choose from, we can meet your power unit requirements.

Standard Front Disc Brakes

Defroster Plenum

Plenum utilizes the fan and the warm air from the heater and has three vents to direct the warm air onto the windshield.
